

# 0.5 Bar High Lifting Bags

MFC International offer a range of 0.5 bar pressure high lifting bags designed primarily for the recovery of vehicles.

- Lightweight and easily portable
- Provide a strong and steady lift to stabilize a vehicle and improve access to casualties
- These bags have a large contact area which means they uniformly distribute lift pressure across a large surface area, making them suitable for lifting at weak points of a vehicle such as the roof, sides, wings, bonnet and boot
- Exceptionally stable
- Strong and durable
- Slip-resistant top surface
- Webbing loops assist with lifting and positioning the bags, and can be used as anchorage points
- Low maintenance costs
- Large lift capacity and height
- Controlled deflation capability

## Used For:

- Road traffic incidents
- Light aircraft crash
- Rescue of animals
- Raising submerged vehicles and small craft
